

OKTA VERIFY CHROME BROWSER EXTENSION

Step 1: Open Chrome

Open a Chrome browser on the computer you will use to access Canvas, email, and My.WIT. Use the following link:

<https://chrome.google.com/webstore/category/extension>

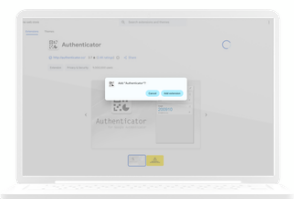

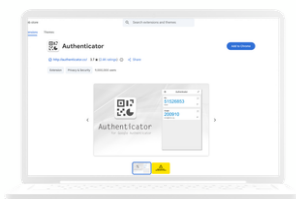

Step 2: Use the Search

Type "Authenticator" in the search bar. Once it appears, click on the "Authenticator" icon.

Step 3: Add to Chrome

Click the blue "Add to Chrome" button.

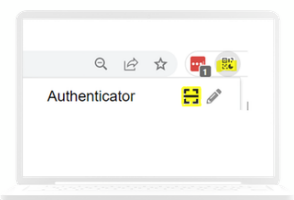

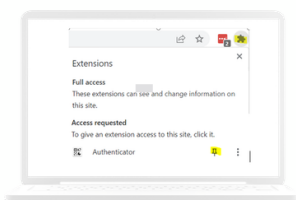

Step 4: Add Extension

You will then be prompted with a pop-up. Click "Add extension."

Step 5: Pin the Icon

You will see a puzzle piece icon in the upper right-hand corner by your search bar. Click this puzzle piece icon. You will be prompted with a drop-down option to pin this extension to the browser. Click on the pin icon.

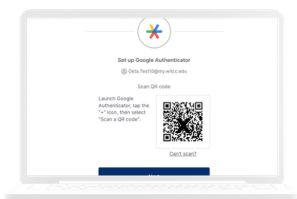

Step 6: Using the Extension

Open Canvas, My.WIT, or your email via Chrome. Then click the Authenticator extension icon on the top right of your browser. Then click the square highlighted in yellow shown here.

Step 7: Drag the + Icon

You will see a + icon. Drag the + icon around the QR code.

Step 8: Access the Code

You can now click the Authenticator icon to view the code.

Congratulations, you did it!

For future logins, if you are prompted for a verification code, click the authenticator app in the top-right corner of your Chrome browser to access it. You will then enter the code in the verification field provided by Okta. If you need any additional help or have questions, please contact the IT Help Desk.
